

Team Zeroes -- XINHUI XU, NICOLE CHENG, SHAMAUL DILMOHAMED

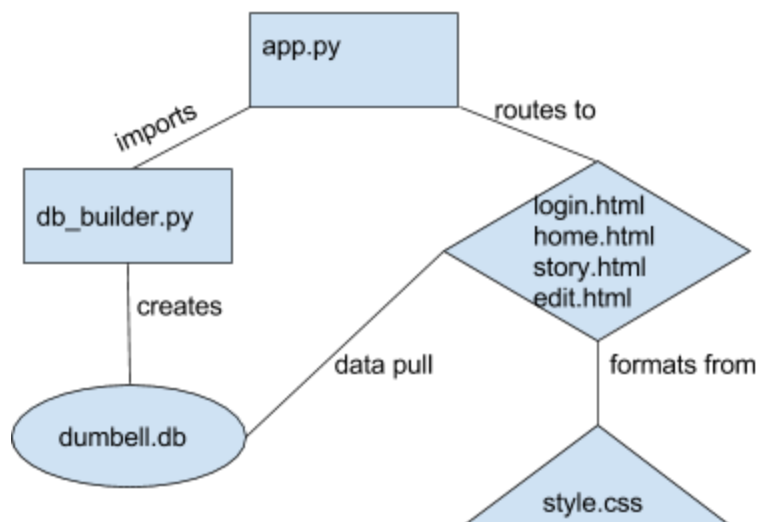

Project manager: XINHUI XU

Overview:

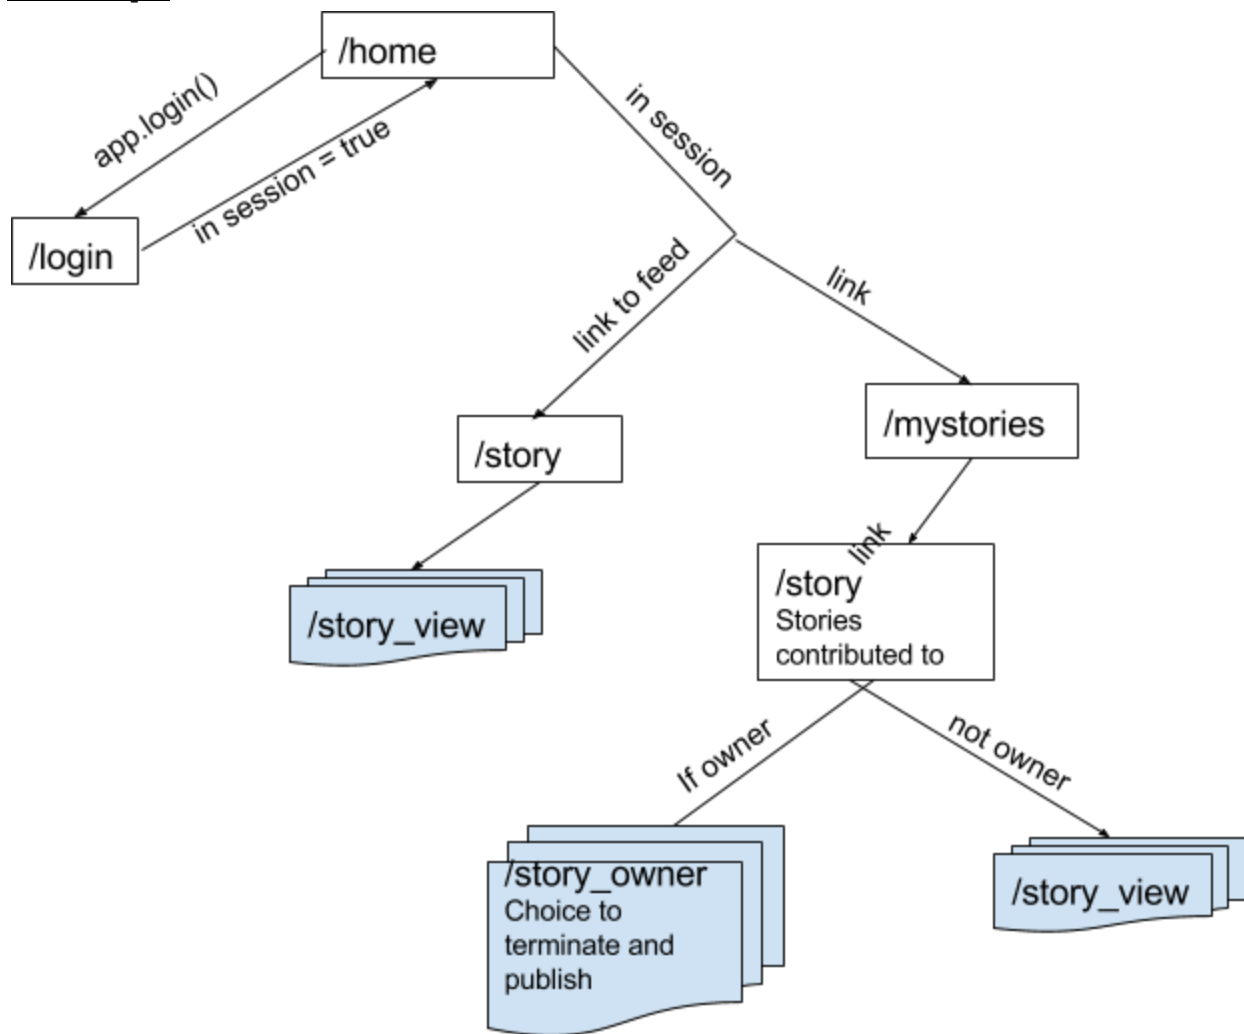

This platform will allow users to register and login in order to start and/or contribute to stories. When signed in, there will be a feed, displaying (1) the various "stories" that can be contributed to, as well as (2) a tab for completed stories that can be read and (3) a button to start his/her own story. The owner is the only one who can terminate a story and have it added to the completed stories archive for others to view.

Component map:

```
/
app.py
/utils
    db_builder.py
/templates
    login.html
    home.html
    story.html
    edit.html
/static
    style.css
/data
    dumbbell.db
```

Site map:

Database schema:

USER: string author, string pw

ALL_STORY: int story_id, string title, boolean terminated

STORY: int story_id, string author, string content

Task Distribution:

Shamaul: Flask application including organizing routes, assigning the templates to relative urls, and simply making sure the application runs

Nicole: Database management -- i.e. linking them to one another and returning the right information to feed into the .py file

Xinhui: Front-end rendering and styling using HTML and CSS
